## Summary

Data analyst with six years in retail and logistics analytics. I turn messy operational data into decisions that save money and time.

## Experience

**Senior Data Analyst, Ridgeway Outfitters (2022 - present)**

- Cut weekly inventory write-offs by 18% ($410K a year) by building a SQL and Python demand forecast used by 42 stores
- Partnered with finance and operations leaders to set quarterly reporting priorities and presented results to the executive team each month
- Rebuilt the Tableau sales dashboard suite, reducing report requests to the analytics team from 60 to 15 a month
- Mentored two junior analysts through their first year; both were promoted

**Data Analyst, Coldwater Freight (2019 - 2022)**

- Automated carrier-cost reconciliation in SQL, cutting month-end close from 9 days to 4
- Designed an on-time delivery model that flagged late-risk shipments with 81% precision
- Led a cross-team project with dispatch and billing to standardise 14 delivery status codes

**Junior Analyst, Pine Street Market (2018 - 2019)**

- Built Excel and SQL reports for 6 store managers on shrink, staffing and sales
- Found a pricing error in the produce category that had cost about $2,000 a week, and worked with the category buyer to fix it

## Projects

- Open-source Snowflake cost monitor (Python, SQL): tracks warehouse spend per team and alerts on spikes; used by two local nonprofits
- Volunteer analyst for Denver Food Rescue: mapped pickup routes and cut average driver time per run from 70 to 50 minutes

## Education

BS Economics, University of Colorado Denver, 2018

## Skills

SQL (PostgreSQL, Snowflake); Python (pandas); Tableau; Excel; dbt basics; forecasting; A/B test analysis
